## /OBJECTIVE/

I'm a full-stack software developer on a mission to find ever better ways to solve the day-to-day problems in life, with the sole purpose of achieving the greatest possible return in 'time'. My approach draws from a varied background that includes fine arts, precision carpentry, and the relentless challenges of restaurant entrepreneurship. Through these experiences, I've learned to fully embrace and appreciate the value of collaboration, adversity, and the goodness of others, all of which have shaped me into the reflective and inspired programmer I am today.

## /TOOL BOX/

HTML, CSS (Sass), JQuery, Javascript, Django, Postgresql, Python 3, React, MongoDB, Express, Slack, Google Sheets

## /PROJECTS/

- + **Customer Demands' Game**, Front-end interactive game on a timer / TECH: JQUERY, CSS, HTML
